

Door setup guide

Three ways to run the door - pick what fits the property. No special hardware required.

[Download this guide as a PDF →](#)

Option 1 - Just the QR code (most common)

Every open house in Foyer has its own QR code. Print it, put it in a frame or on a sign stand by the front door, and visitors check in on **their own phone** - no app download, no line at a tablet.

Sign in at app.foyeroh.com on your phone. While your open house is live you'll see the check-in count, the QR to show walk-ups, and every visitor's score the moment they

submit. For one-tap access, add Foyer to your home screen:

For busy properties, any tablet you already own becomes a self-serve check-in station. A used iPad or a ~\$150 Amazon Fire tablet works fine - there is nothing to install.

Questions? hello@foyeroh.com - we'll get you set up.
